INFRASTRUCTURE

Whether your business is spread across multiple sites, or concentrated in a single area of activity, in today's technology dependent economy, very little business can be transacted if your IT infrastructure fails.

As the old proverb says: "A chain is only as strong as it's weakest link". If one key component in your network infrastructure fails, there is no network, however well maintained and resilient other components may be.

BENEFITS OF MANAGED NETWORK INFRASTRUCTURE

- ✓ Wide range of connectivity technologies and from independent carriers.

- ✓ Proactive monitoring, support and management

- ✓ Best of breed solutions from Cisco and Juniper, CCIE and JNCIE Engineers</p

- ✓ Cisco Routing and switching specialists (BGP, OSPF, EIGRP, RIP, STP)

- ✓ Performance reports available

- ✓ Bespoke network design with tailored SLAs available

- ✓ QoS enabled networks designed to ensure critical applications always perform
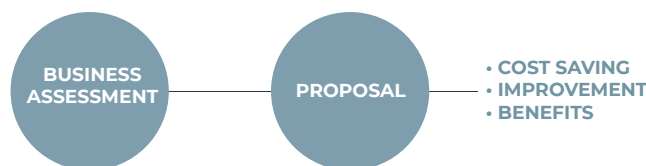

This is where we can help. We audit and assess your current infrastructure and provide you with recommendations based on our findings. This will include weak spots and areas for growth, plus a suggested plan for the improvement of your infrastructure. We work with you to design a roadmap based on your business requirements, deploy a new infrastructure environment that will allow you to seamlessly grow, and offer ongoing management of it for your total peace of mind.

We'll always provide you with detailed and regular reporting so you can see how we're performing and part of the Qcom service is proactive, round the clock advice and management. We understand that all the businesses are different and so we provide solutions to businesses of all sizes and we always tailor to your budget and specific needs to ensure we get the best IT solution for you.

HOW OUR BESPOKE PACKAGES WORK

Once we fully understand your business and requirements, we put together a proposal that we think will work best for your organisation. This includes areas where we feel there is room for improvement and also cost savings where possible. During this process, we will consult you to ensure you are happy and you understand the benefits that the proposed solution will bring.

Together, we can build the best IT environment for your business.
