CLOUD

It's becoming more and more important that businesses begin to integrate cloud computing as a part of their IT environment. However, you decide to integrate cloud computing, there are numerous benefits for your business if you do; it provides a predictable cost model, is easy to scale, makes remote working a lot easier, and provides increased resilience. All of these benefits are paramount in today's rapidly evolving market.

QCOM CLOUD

QCom cloud is a global converged cloud-native service that securely connects all branches, data centers, people, and servers. Qcom Cloud can be gradually deployed to replace or augment legacy network services and security point solutions to ease the transition.

Organisations that require the continued use of on-premise infrastructure can still utilise cloud services such as backup, storage and disaster recovery alongside the on-premise infrastructure. We can bridge the gap so both your on-premise and cloud solutions work in harmony.

Whether it's Microsoft's O365, backup/storage or telephony solutions, migrating to or taking on a new cloud service can be a minefield if not properly thought out, and that's where we come in. We'll consult with you on your needs and current challenges, and provide you with Cloud recommendations based on what you will gain valuable benefits from.

We'll provide you with the expertise that will elevate your cloud environments, new or old, and help you to make informed decisions for your business, all whilst keeping what is best for your needs and budget in mind.

Our experience means that you will receive advice from our experts who are highly skilled in assessing your current IT and connectivity, deploying robust installations, ensuring safe migration, and providing ongoing support and management for your solutions.

HOW OUR BESPOKE PACKAGES WORK

Once we fully understand your business and requirements, we put together a proposal that we think will work best for your organisation. This includes areas where we feel there is room for improvement and also cost savings where possible. During this process, we will consult you to ensure you are happy and you understand the benefits that the proposed solution will bring.

Together, we can build the best IT environment for your business.

BUSINESS ASSESSMENT — **PROPOSAL**
